Employment Update: Local Counties on State Watch List *Posted July 9, 2020*

Due to a recent rise in coronavirus cases, both Napa and Marin County have been added to the State Department of Health's watch list this week. This means that the State is now requiring the closure of the following businesses and activities in Napa and Marin County:

- All brewpubs, breweries, bars and pubs, both indoor and outdoor services
- Indoor dining at restaurants
- Indoor wineries and tasting rooms
- Indoor family entertainment centers
- Indoor movie theaters
- Indoor zoos and museums
- Indoor cardrooms

The businesses listed above must remain closed for at least 3 weeks, but the closure can be extended if the number of cases does not improve. For now, the listed operations should expect to remain closed through July 30, 2020. Marin County also announced that they have postponed the next stage of reopening until a later date, which includes gyms and fitness studios, various personal services like nail salons, massage services, and estheticians, and tattoo or piercing shops.

Wineries are still permitted to have outdoor tastings but all indoor activities, including guest check-in, should be relocated outdoors. Restrooms may still be used indoors, however, face coverings are required and social distancing protocols should be enforced. We recommend limiting the number of guests at a time that can use indoor restrooms to avoid queues inside.

Sonoma County is also currently being monitored by the State and is expected to be placed on the Department of Health watch list either tomorrow or Monday. If Sonoma County is placed on the watch list, the same restrictions listed above will also apply in Sonoma County. We will keep you updated once the restrictions are confirmed in Sonoma County.
